What should still work?

A team worksheet for one service, rule or relationship. Use with Issue 01. Work through the questions together; record evidence and a decision, not an automatic score.

1 / Market and location

Name the market, place and current problem.

Your notes: _____

2 / The function

What should still work after support? Name the function, rather than a training or grant activity.

Your notes: _____

3 / People and access

Who should benefit? Who may be excluded, and what would make access practical?

Your notes: _____

4 / Provider and payer

Who delivers? Who pays after support? What do demand, costs and provider capability suggest?

Your notes: _____

5 / Evidence and uncertainty

What has been observed, by whom and when? What remains uncertain? What would change your mind?

Your notes: _____

6 / Decision and follow-up

Continue, test, redesign or stop? Record the next evidence task, decision owner and review date.

Your notes: _____

Ask one final question: what happens to people if the funding arrangement fails?

A completed worksheet is not proof of sustainability. Send a public-safe learning summary to ugmsdnetwork@gmail.com and state your publication permission; do not send confidential records.
